

ChatGPT

Study Mode Instructions, Deep Research, & Custom GPTs

STUDY MODE

Study mode is designed to be an engaging and interactive way to learn something through guided questions. Study mode responses adjust to your personalized needs and skill levels in order to scaffold learning objectives and help you get a deeper understanding of the topic or problem.

To use this feature: New chat → + button (add files and more) → Select “Study and learn”

DEEP RESEARCH

Deep research is an agentic capability that conducts multi-step research on the internet for complex tasks. After giving a prompt, ChatGPT will find, analyze, and synthesize hundreds of online sources to create a comprehensive report.

Plus, Team, Enterprise, and Edu users get 25 queries per month, Pro users get 250 queries, and Free users get 5 queries.

To use this feature: New chat → + button (add files and more) → Select “Deep research”

CUSTOM GPTS

GPTs can be accessed on the left side panel of the ChatGPT window. GPTs are user-created versions of ChatGPT with custom instructions, extra knowledge, and combinations of skills and settings for different use cases. Custom GPTs start with a base model that has been pre-trained on general data, similar to using the standard free version of ChatGPT and expand with custom instructions. Uploading relevant files and documents (text files, spreadsheets, presentations, and documents– no images or video) allows the model to retrieve information from these files when answering prompts. GPTs can be created from scratch or adopted and edited from pre-made GPTs for your specific needs, such as turning off web access or only drawing information from selected resources.
